

Vahitorni aknad

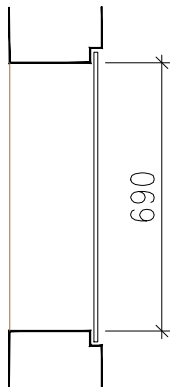

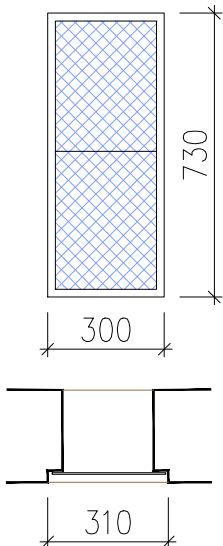

A54

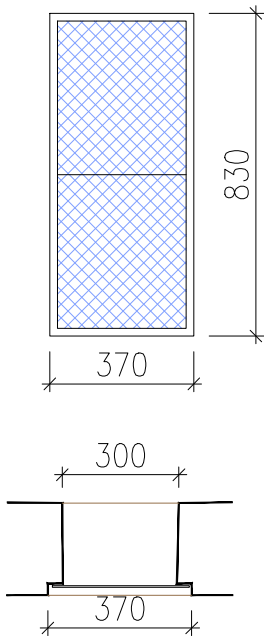

A55

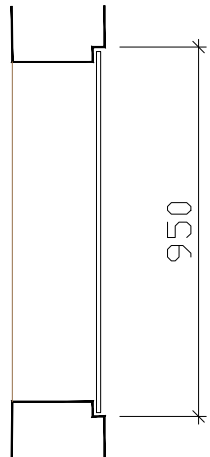

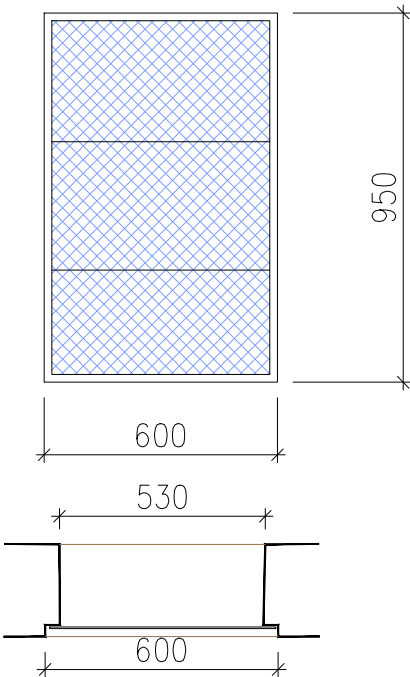

A57

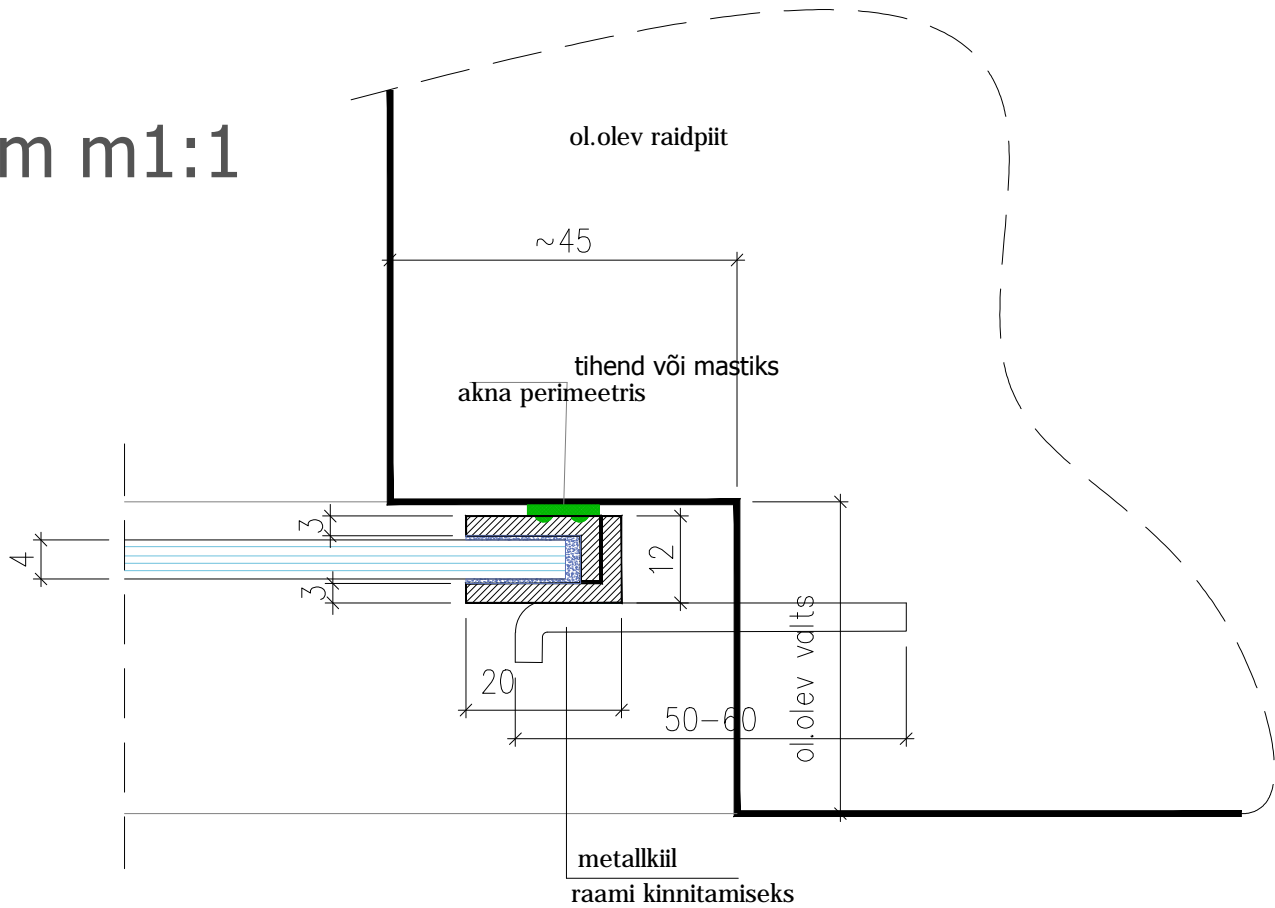

A58

A56

Sõlm m1:1

- 1.Kõik aknad valmistada ühekordsest armeeritud klaasist (paksus 4 mm) mis on kinnitatud metallraami;
- 2.Akende A56 ja a 58 avad müüris on tugevasti murenenud. Eelnevalt korrastada ja parandada aknaümbruse müüritis;
3. Klaasi paigaldamisel jälgida et võrgu silm jääks rombina;
4. Mõõdud kontrollida ehituslike avade järgi;
- 5.Kittide, silikoonide kasutamisel peab kivipinna eelnevalt impregneerima (nakkedispersiooniga kruntida).
